ArchivingDocument vs
ArchivingDocumentVM

ArchivingDocumentService - Methods

Service Methods

Method	Purpose	Parameters	Notes / Behavior
GetAllAsync	Retrieve all documents	None	Returns IEnumerable<ArchivingDocument>, async
GetByIdAsync	Fetch document by ID	int id	Nullable return, repository lookup
AddAsync	Create new document with file	ArchivingDocument entity	File upload via FileHelper, stores PdfFilePath, commits transaction, returns new ID
UpdateAsync	Update existing document	ArchivingDocument entity	Handles file replacement if uploaded, preserves path if no file, commits changes
DeleteAsync	Delete document and PDF	int id	Deletes physical file, removes DB record, commits transaction

ArchivingDocument Entity - Fields

Entity Properties

Property	Type	Meaning / Usage	Notes
Id	int	Unique identifier	Primary key
Title	string	Document title/subject	Max length 200
Date	DateTime?	Date associated with document	Nullable
Authority	string	Issuing authority	Max length 200
DocumentReferenceNumber	string	Official reference number	Max length 200
Type	DocumentType?	Document classification	Enum-based
PdfFilePath	string	Path of uploaded PDF	Stored on server, not file itself
PdfFile	IFormFile (NotMapped)	Used for file upload	Not stored in DB
