EmployeesController Actions

Action	Signature	Description
Index	<code>public async Task<IActionResult> Index(string? searchTerm, DateOnly? dateFrom, DateOnly? dateTo, int page = 1, int pageSize = 50)</code>	Displays paginated employee list with optional filters. Returns View or PartialView with EmployeeVM.
AddEdit (GET)	<code>public async Task<IActionResult> AddEdit(int? id)</code>	Displays form to add or edit employee. Populates nationality dropdowns.
AddEdit (POST)	<code>[HttpPost] public async Task<IActionResult> AddEdit(EmployeeVM model)</code>	Handles submission for creating/updating employee. Validates file uploads.
Details	<code>[IgnoreAction] public async Task<IActionResult> Details(int id)</code>	Displays full details of a single employee. Preserves previous URL.
PrintDetails	<code>[IgnoreAction] public async Task<IActionResult> PrintDetails(int id)</code>	Returns a printable view of employee details.
GetEmployeeAttachments	<code>public async Task<IActionResult> GetEmployeeAttachments(int id)</code>	Returns a partial view of employee attachments.
UploadEmployeeFiles	<code>[HttpPost] public async Task<IActionResult> UploadEmployeeFiles(EmployeeAttachmentsVM model)</code>	Handles uploading of employee attachments.
Delete	<code>[HttpPost] public async Task<IActionResult> Delete(int id)</code>	Deletes an employee by ID. Redirects back to Index.
Print	<code>[IgnoreAction] public async Task<IActionResult> Print(string? searchTerm, DateOnly? dateFrom, DateOnly? dateTo, int page = 1, int pageSize = 50)</code>	Returns printable employee list filtered by search term and dates.
createExcelReport_Download	<code>[IgnoreAction] public async Task<IActionResult> createExcelReport_Download(string? searchTerm, DateOnly? dateFrom, DateOnly? dateTo, int page = 1, int pageSize = 50)</code>	Generates and downloads Excel report of employees filtered by search term/date range.

EmployeeService Methods

Method	Signature	Description
HasRelatedObjectsInDb	<code>public async Task<bool> HasRelatedObjectsInDb(int empId)</code>	Checks if employee has related records in other tables (ExternalWorkMissions, SalaryManagements, EmployeeAttachments).
GetAllAsync	<code>public async Task<IEnumerable<Employee>> GetAllAsync()</code>	Returns all employees including their Nationality.
GetByIdAsync	<code>public async Task<Employee?> GetByIdAsync(int id)</code>	Returns a single employee by ID.
AddAsync	<code>public async Task<int> AddAsync(Employee entity)</code>	Adds a new employee. Saves employee photo if provided.
UpdateAsync	<code>public async Task UpdateAsync(Employee entity)</code>	Updates an existing employee. Handles image replacement if new photo uploaded.
DeleteAsync	<code>public async Task DeleteAsync(int id)</code>	Deletes an employee by ID and removes associated photo file from disk.
UploadAttachmentsAsync	<code>public async Task UploadAttachmentsAsync(EmployeeAttachmentsDTO model)</code>	Handles uploading employee attachments. Deletes old files removed from list and saves new files.
GetAttachmentsAsync	<code>public async Task<IEnumerable<EmployeeAttachment>> GetAttachmentsAsync(int empId)</code>	Retrieves all attachments for a specific employee.
