SMSController – Overview

Purpose	Manage SMS messaging, member targeting, message logging, and reporting
Area	Admin
Authorization	AdminAuthorize

SMSController – Dependencies

Dependency	Responsibility
ISMSService	SMS business logic and gateway integration
IMemberService	Member data access
IMapper	AutoMapper object mapping
IConfiguration	Application configuration

SMSController – Actions

Action	HTTP	Description
SendSMS	GET	Test endpoint with hardcoded recipient and message
Send	POST	Main AJAX endpoint for sending SMS messages
Members	GET	Member listing and selection for SMS targeting
MessagesLogs	GET	Searchable SMS message history
PrintMessagesLogs	GET	Printable SMS message logs
createExcelReport_Download	GET	Export SMS logs to Excel

SMSStatus Enumeration

Value	Name	Display	Description
0	Success	Localized	Message delivered successfully
1	Fail	Localized	Message delivery failed

SMSService – Overview

Purpose	SMS sending, delivery tracking, logging, and gateway integration
Layer	Service Layer

SMSService – Dependencies

Dependency	Description
SmsSettings	Gateway configuration via IOptions
HttpClient	SMS API communication
IUnitOfWork	Database persistence and transactions

SMSService – Core Methods

Method	Returns	Description
GetAllAsync	IEnumerable<SMS>	Retrieve all SMS messages with receivers
SendMessageAsync	Task	Send SMS in broadcast or targeted mode
GetAllMessagesLogsAsync	IEnumerable<MessageLogDTO>	Retrieve full message history
SendSMSAsync	bool	Direct gateway SMS sending

OTP Entity

Property	Type	Constraint	Description
Id	int	Key	Primary key
Code	string	MaxLength(128)	Hashed OTP value
CreateAt	DateTime	Required	Creation time
ExpireAt	DateTime	Required	Expiration time
IsUsed	bool	Default false	Usage status

SMS Entity

Property	Type	Constraint	Description
Id	int	Key	Primary key
Text	string	—	SMS content
SendingDate	DateTime	Default Now	Send timestamp
IsDeliveredSMS	SMSStatus	Enum	Overall delivery status

SMSReceiver Entity

Property	Type	Constraint	Description
ReceiverId	int	Required	Member ID
PhoneNumber	string	MaxLength(20)	Recipient phone
IsDelivered	SMSStatus	Enum	Individual delivery status
