

Overview

Certificate Module Responsibilities	
Responsibility	Generating course certificates
Responsibility	Creating secure, verifiable QR codes
Responsibility	Allowing public certificate verification
Responsibility	Displaying and printing the original certificate

This module ensures that every issued certificate can be validated online using an **encrypted certificate serial** embedded inside a QR code.

Architecture Summary

Main Module Components	
Component	Description
CertificateController	Handles certificate generation, encryption of certificate serials, QR code creation, and public verification logic.
Certificate Verification View	Public-facing view that displays whether a certificate is valid or invalid after scanning the QR code.
Printable Certificate View	Renders the official certificate layout optimized for screen display and printing.

Flow Summary

Certificate Lifecycle Flow	
Step	Action
1	Print Certificate
2	Encrypt Certificate Serial
3	Generate QR Code
4	Public QR Scan
5	Certificate Verification
6	Valid / Invalid Result
7	(Optional) View Original Certificate
