Course Module – Member Area Documentation

CourseController – Overview

Aspect	Description
Area	Member
Purpose	Manages member interactions with courses (listing, subscription, rating, certificates)
Advanced Features	OCR, AI-based ID validation, SignalR notifications

Controller Attributes

Attribute	Purpose
[MemberAuthorize]	Restricts access to authenticated members
[Area("Member")]	Registers controller in Member area
[Route("Member/{controller}/{action}")]	Defines explicit routing

Injected Dependencies

Dependency	Responsibility
IUnitOfWork	Database access and transaction management
IHttpContextAccessor	Session and user context access
ICourseService (Member)	Member-side course logic
ICourseService (Admin)	Certificate generation and reporting
IOCRService	ID card OCR text extraction
IHubContext<NotificationHub>	SignalR real-time notifications
INotificationService	Persistent notification handling
