Home Member - Full Moduel Documentation

Member HomeController Overview

Item	Value
Namespace	FougeraClub.Areas.Member.Controllers
Controller	HomeController
Area	Member
Base Route	Member/Home/[action]

Controller Responsibilities

Responsibility	Description
Dashboard Rendering	Displays the main member home dashboard
Courses & Activities	Fetches member-related courses and activities
Localization	Handles Arabic / English language switching
Error Handling	Displays custom error pages for HTTP errors

Injected Dependencies

Dependency	Type	Purpose
_unitOfWork	IUnitOfWork	Centralized repository access
_accountService	IAccountService	Member account and authentication logic
_activityService	IActivityService	Retrieves member activities
_courseService	ICourseService	Retrieves member courses
_httpContextAccessor	IHttpContextAccessor	Session and HTTP context access
_mapper	IMapper	Entity → ViewModel mapping

Security & Localization

Index Page Structure

Section	Description
Model	Uses HomeActivityCourseVM
Data Display	Iterates courses and activities
Conditional Styling	Highlights accepted courses
Dynamic Actions	View, Subscribe, Rate, Print Certificate
Client Features	Modals, tooltips, AJAX operations

Error Pages (403–503)

Error Code	Meaning	Behavior
403	Forbidden	Access denied page with redirect option
404	Not Found	Missing page or resource
500	Server Error	Unhandled system error
503	Service Unavailable	Maintenance or downtime

Security & Localization

Aspect	Description
Authorization	MemberAuthorize attribute
CSRF Protection	Anti-forgery tokens in forms & AJAX
Localization	Session-based Arabic / English resources
RTL/LTR	Automatic UI direction switching

- ✓ Clean MVC separation
- ✓ Unified dashboard ViewModel
- ✓ Multilingual & secure
- ✓ User-friendly error handling
